

## Assignment-1 Questions

1. What is a computer ?

Ans :- A computer is an electronic device that can perform a wide range of tasks, including processing and storing data, running software programs, and connecting to the internet. It typically includes a central processing unit (CPU), memory, storage, and input/output devices. There are many types of computers, including desktops, laptops, tablets, and smartphones.

2. What is RAM ?

Ans :- RAM stands for Random Access Memory. It is a type of computer memory that is used to temporarily store data that the central processing unit (CPU) uses during operation. RAM is volatile memory, meaning it is wiped clean when the computer is powered off. The more RAM a computer has, the more data it can store and access quickly, which can improve the performance of the computer.

3. Where is data store in a computer ?

Ans :- Data is stored in a computer's memory, which can include both volatile memory (such as RAM) and non-volatile memory (such as a hard drive or solid-state drive). Data can also be stored on external devices, such as USB drives or cloud storage.

4. What is that input device used to type text and numbers on a document in the computer system ?

Ans :- The most common input device used to type text and numbers on a document in a computer system is a keyboard.

5. What are the output devices ?

Ans :- The most common output devices are monitors, printers, speakers.

6. Which is the input device that allows a user to move the cursor or pointer on the screen?

Ans :- The input device that allows a user to move the cursor or pointer on the screen is mouse.

7. Which language is directly understood by the computer without a translation program ?

Ans :- A computer's central processing unit (CPU) can only understand machine language, also known as machine code, which is a series of binary digits (0s and 1s) that the CPU interprets as instructions. Machine language is the only language that can be directly executed by the CPU without the need for a translation program.
